The Future Of Learning

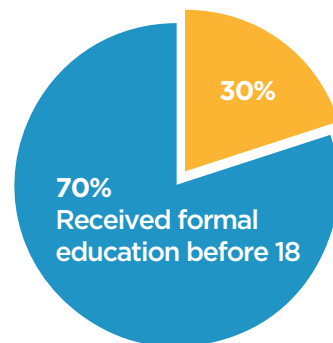

A New Blueprint

- With AI influencing everything from business to public systems, AI literacy has become essential for everyone.
- Less than 30% of Indian students receive formal digital or financial literacy before 18.
- Financial understanding—personal + public—is becoming a core survival skill.
- Rising job-market uncertainty means entrepreneurship, communication, innovation & tech skills are critical

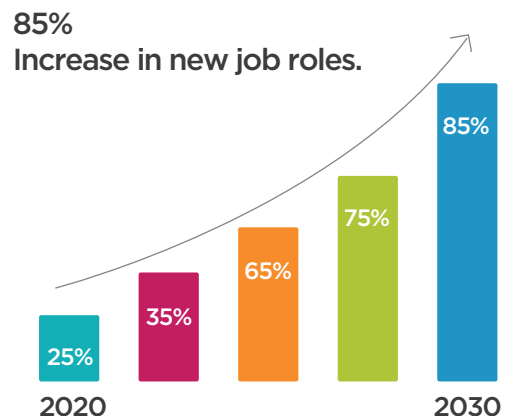

AI-related jobs are projected to grow **300%–1000%** in the next decade (LinkedIn, 2024).

Under **30%** of Indian students get **digital or financial education** before age 18 (NCFE, RBI, 2023).

85% of the jobs that will exist in 2030 haven't been invented yet (World Economic Forum, 2020).

What **We** Offer ?

- Beginner to Advanced Learning Programs for critical 21st Century skills (The **Beyond Academics** school curriculum)
- Technology led career pathway setup for school students.

All courses conceptualised & designed in collaboration with Industry experts and accomplished coaches well experienced in experiential teaching.

Expert educators delivering classes across India — both online and in-person.

A technology platform following an easy and do-it-yourself approach to deliver learning programs at student's chosen pace.

Personal navigator for student to discover, select and build a career pathway for each stage of their academic journey leading to a dream College Admission.

What **We Aim** For ?

Our mission is to partner with schools to cultivate essential 21st-century skills, shaping students into independent thinkers, problem-solvers, and responsible future leaders.
